

September 2018

Carlos Delgado's G4M Betty

We had 26 members and one visitor show up at the September meeting. The visitor was selling some of his models and he was a member of the club about ten years ago. Paul Hyder has pretty much quit modeling but has not retired from teaching science at Eastwood High School.

Roy Lingle did not make the meeting as his wife had a TIA during the week and he was taking care of her. We wish her well and a quick recovery.

Lucas Whittington attended the meeting. He joined the group at the Veteran's Day show at Bassett Place last November, but work and other assignments have kept him away from all but a couple of meetings. It was good to see him get to attend.

Duane Velasquez is back at work at the local hobby shop.

The Bassett Place annual show is in the works. Our insurance should be in this week and I will be able to sign the contract with them as soon as the insurance paper work is sent to me. Our thanks to David Lockhart, the Director of Local Chapters for his efforts with the insurance.

Again, we will set up at 8:00 on September 22. Remember, **Saturday, not Sunday**. More on the location as it comes available.

Attention:

**Bassett Display on Saturday
22, 2018 at 8:00 AM**

Folks that signed up for the display.

We will set up on the Mall in the FYE area. Use the Montana entrance (the same one we used last fall). We will be in the area in front of FYE out in the main traffic lane. I will not be at the Kohl's entrance but at the northwest corner of the mall.

Steve Herren's Gun Boat.

Speaking of Sunday, I sent out the August issue of the GLUE very late in August. On the next to last page in bold letters I mentioned that the September meeting would be on the 9th not the 2nd. Three members asked me if we were meeting on the 2nd. Looks like I need to put the calendar in every issue. I made a list of the yearly meeting dates and we discussed and voted on the dates in January. I published the calendar a couple of times and mentioned the next meeting date in each and every issue of the newsletter.

Here is the latest news from Arma Hobby shop.

Check our offer for plastic parts (Junior set with photoetched parts) and benefit from deal packages: newsletrr@armahobby.pl will get you to their web site. Some interesting kits and paints and many items from Poland. I have no affiliation with these folks. They just have a new line of paints and some new kits.

Steve Herren, our photographer tried a new method and background for the photos this month. Thanks to Steve for spending much of his time taking and processing the photos for the GLUE. He has spent a great deal of time trying to get a better presentation of the pictures.

Lucas Whittington's Fantasy Figure.

Mike Boudreaux was in town visiting his parents. He came by the house on Sunday afternoon and we had good visit. Mike reported that he had won two First Place awards in the San Antonio Contest.

One was in single engine 1/48th scale which is usually divided into several areas due to the number of entries. To even place in one of those categories is great. His other First Place was a World War I entry also in 1/48th scale. Congratulations to Mike. .

Carlos Delgado's Stug III.

Our insurance info came while I was typing these notes. I got it yesterday (Monday Sept. 10) but there was more information that needed to be added to the form. One day on correcting the error is pretty good service.

Rick Wongsing's F-8E

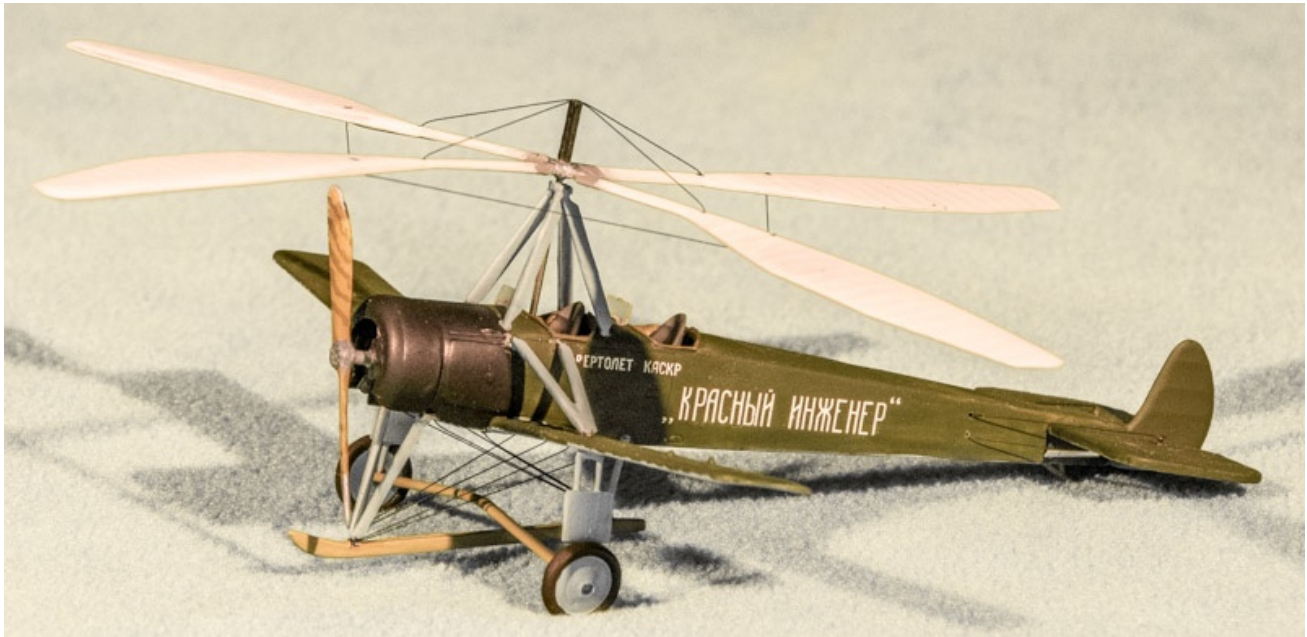

Sal Samaneigo's M60A3.

Michael Kennedy's F-101A Voodoo

Jerry Richardson, one of members that happens to live in Amarillo TX sent me a couple of pictures of his latest effort. It will appear on the next page. Jerry used the Monogram 1/48th kit.

Michael Garcia's Kack P-1 Auto Gyro.

Jerry Richardson's F-101B Voodoo.

Arthur Berwick had several Historex figures to show. If you are not familiar with the Historex Line, each individual figure comes with several parts so that you can pose the figure. Multiple arms and legs are offered to the modeler. Also, Historex includes a choice of rank, chapeaus, arms and swords in some cases. There might be two or three types of uniforms that can be modeled, full dress, marching order or walking out attire. In each package, there is usually a color card with several different figures that can be built from the kit. Arthur has posed several of the figures into vignettes as presented on the color card.

Arthur Berwick's RD 31, Mk III UN Personal Carrier.

Tommy Delgado's A-4E Skyhawk

This A-4E was flown by LCDR John S. McCain III.

Michael Kennedy used Caracal decals on his F-101A Voodoo.

Rick Wongsing used the Aries cockpit and jet nozzles for the AV8-B harrier. It took him two years to finish the F-4C. His F-105D had tons of Eduard PE and resin plus some scratch-built pylons. Rick used the Hasegawa weapons set to load the aircraft. This aircraft was flown by Vic Vizcarra, Korat Air Base, Thailand in 1968. The pictures of the Harrier were not used in this issue.

Rick Wongsing's F-105D.

Kenyon Souflee's F-14.

Rick Wongsing's F-4C

Arthur Berwick's Voltigeurs French Light Infantry.

Richard Macias's F6F Hellcat.

Arthur Berwick's Capitan of Chasseurs and Fusiliers.

Rick Wongsing

David Torres

Arthur Berwick's French Line Grenadiers.

Rick Wongsing's AV8 Harrier Steve sent me anew picture. Thanks.
