

August 2024

Fermin Pico's Trumpeter 1/32nd scale Mig i5

Our August meeting was another outstanding event with the membership interacting on a grand scale., with many lively discussions among all. Thirty-eight attended the meeting. We had at least four regular members that were absent which would have given us the largest attendance in several months. Looks like we are thriving as a club.

Our next meeting will be on September 8 as we have met on the second Sunday in September since 1970 because of the Labor Day weekend.

David Torres's Diorama in 1/35th scale

This represents a Late WW2 scene somewhere in Germany.

The British infantry are Dragon figures, in 1/35th, scale with Airfix MK III helmets. The tank is a late war Tiger (Tamiya model painted with Vallejo paints). Miniart base and building painted with Vallejo acrylics. Weathered with pastels and washes. The signs by Verlinden.

These were old kits that I had for a while. Just trying to chip away at the stash.

The modelers provide their information on a Photo Info Sheet. The more information provided by the modeler, the more complete is the information presented in the newsletter. Your help is appreciated.

Tony Barnard's 1963 Corvette

Much of this model was scratch built, the floor, the Dash/Cage, the Hemi motor with the stacks and the wing. The front area and the back tub were taken from other car kits. The result, The Assembled Carolina Hooker.

Hector Gonzalez's AMT 1/24th scale Chevrolet C3500

FYI: I taught English for ten years I was used to reading all shapes and sizes of handwriting. At times, it is difficult to decipher what you folks are giving me as formation . Sorry if I don't always get it correct.

Efren Zamora's AMT 1970 Camaro Z28

Efren took the engine from a 1967 Chevelle kit. He made the header from solder. The carburetors were 3-D printed. The roll bar was scratch built, and the traction bars were handmade (Lakewood.)
