

February 2025

Gerasimos Grigonopoulos's 1/35th scale Vignette

Our February meeting was another successful event. I read that on Facebook so it has to be true. We had thirty-five members, family, and guest at the meeting. Our guest were Nicholas Dominguez and Nicole Babenco. Welcome. We were glad you came and invite you to return. Nicholas interest is in armor.

Our next Model Display at Bassett Place Mall in on Saturday, March 15. See Michael Garcia or Hector Gonzalez to sign up and get the details about the event.

Thanks to Paul Hyder, a former member for donating several models to the club. Much Appreciated.

**Our next meeting is on March 2, 7000 Edgemere at 2:00 P.M.
Bring a Model and Bring a Friend.**

Clif Bailey's DAS WERKS 1/35th scale "Gepanzerter Munitionsschlepper"

Clif Bailey attended the San Antonio Model Fiesta during January. He brought home two awards but stated that he could have won a couple more if he had read the instructions. Awards required bases for extra points and judged on a point system. Items in the stowage in the photo are from Tamiya and Value Gear. Cliff used acrylic Vallejo Model Air paint on the model.

Mike Boudreaux, a former member attended the same event. He took home two awards and he stated that he also could have won a couple more had he placed the entries on bases.

Joe Martinez missed the January meeting because he attended a model contest in Phoenix, Arizona. He sent several pictures of the event and gave a positive report about it. However, he did not say if he had entered anything at the event. More on this later, if he has more to report.

Since we have a number of new readers, this newsletter is a history of what we do as a club. If something appears here, it happened. Once when I reported an event where we bought something for those in need, I was asked to provide the receipt, etc. Of course, I didn't respond to the request because as stated: If it appeared here, it happened. The GLUE's name

was selected by Homer Shanks the first editor and originator of the newsletter. He hoped it would hold the group together.

Fermin Pico's 1/35th scale RPM Marder I

Roger Gutierrez's AMT 1965 Ford Fairlane

If anyone would like to develop a build article or any type of article for the newsletter, I would welcome your effort. In the past, we have included several from various individuals.

Dues are due and only \$15.00 per year. Those who paid support the club. Please bring your membership card to the meeting. It seems that some have not paid in two years.

David Torres's 1/35th scale Tamiya Panzer IV Ausf J

David used Vallejo acrylics weathered with AK mud effects and Vallejo pigments. Built basically out of the box.

Tony Barnard's 1/25th scale Jet Dragster "The Joker"

A Top Fuel Car frame is the basis for this model. Tony added a Shockwave Jet Truck engine. He added a honeycomb grille as a debris cover. The fuel tank and parachute container were aircraft bombs. He painted the model with Neon Green and Black and used Tamiya metallics on the Jet engine.

Hector Gonzalez's 1/25th scale Lindberg 1964 Plymouth

Built in honor of Ricard Petty's First of Seven wins at the Daytona 500, fifty-one years ago.

Hector's AMT 1/25th scale 1932 Ford Vicky

Hector's AMT 1/25th scale Chevelle

Zachary Corbin's 1/72nd scale Academy A-10
